Instructions for applying eye drops

Step 1

Wash your hands. Tilt your head back and look at the ceiling.

- If you wear contact lenses, remove them first, then wait 15 minutes after using your eye drops to put them back into your eyes.
Step 2

Using your index finger, pull down your lower eyelid to form a pocket.
Step 3

Gently squeeze 1 drop into the pocket. Don't let the bottle tip touch your eye, your fingers, or anything else.

Step 4

Gently close your eyes and lightly press on the inside corners of your eyes.

Step 5

Carefully blot away any excess liquid that may be on your skin.
